Education

- **Dr B R Ambedkar National Institute of Technology Jalandhar** 2023 – Present
Bachelor of Technology — Data Science

Technical Skills

- **Languages & Databases:** Python, C/C++, JavaScript, SQL, HTML/CSS, Bash, MySQL, NoSQL SQLite
- **Frameworks, Libraries & Tools:** React, Tailwind CSS, Node.js, MongoDB, REST APIs, Git, GitHub, VS Code, Vite, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib, NLTK, SpaCy, Tableau, Google Colab
- **AI & Machine Learning:** Generative AI, LangChain, Prompt Engineering, Natural Language Processing, Computer Vision, Deep Learning
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Database Management Systems, Operating Systems, Mathematics for Data Science

Experience

- **Plasmid Innovations — Machine Learning Trainee — Remote — Apr 2025 – Jun 2025:**
 - Built an email spam detection model achieving 97% accuracy using supervised machine learning techniques over a 2-month training program.
 - Reduced data noise through preprocessing and feature engineering, improving model generalization.
 - Benchmarked Logistic Regression, Naive Bayes, SVM, and Random Forest models to select the highest-performing classifier.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Feature Engineering, Supervised Learning

- **Third Space Travel — Full-Stack Developer — Freelance Project — 2026:**
 - Developed responsive and interactive user interfaces for a full-stack travel platform using React and TypeScript.
 - Integrated frontend components with REST APIs to implement authentication, booking and management workflows.
 - Collaborated with backend developers to consume APIs and ensure seamless data flow between the client and server.
 - Contributed to improving user experience through reusable components, responsive layouts, and performance optimizations.

Tech Stack: React.js, TypeScript, SCSS, Framer Motion, tRPC, REST APIs

Projects

- **Sofia – Virtual Assistant** [\[Live Demo\]](#):
 - Built an AI-powered virtual assistant (React frontend, FastAPI backend) supporting 50+ voice commands with speech-to-text and text-to-speech.
 - Integrated the Gemini LLM and 4+ external REST APIs to answer queries and retrieve real-time information, cutting average response time to 2s.
 - Automated 10+ desktop tasks (opening websites, playing music, fetching news) and deployed the app with separate frontend/backend services for public access.

Tech Stack: React, FastAPI, Python, SpeechRecognition, Gemini API, REST APIs

- **Quiz Piece – Full-Stack Quiz Platform** [\[Live Demo\]](#):
 - Built a full-stack quiz platform featuring JWT authentication, protected routes, and user profile management.
 - Implemented category-wise quizzes, difficulty selection, score tracking, and dynamic question rendering using MongoDB-backed REST APIs.
 - Deployed the frontend on Vercel and backend on Render with production-ready environment configuration.

Tech Stack: React, Node.js, Express.js, MongoDB, JWT, REST API, Vercel, Render

Certificates

- **Speed Quant (Competitive Programming) — Winner:** Ranked **1st** in the Main Track competing against top DSA programmers from 2nd and 3rd year at NIT Jalandhar. Recognized for speed and accuracy in solving algorithmic challenges under timed conditions.

Coding Profiles

- **LeetCode:** 400+ problems solved (Top 88.68%), max contest rating 1456, 4 badges earned
- **Codeforces:** Contest rating 999 (Newbie), competed in 7 rated contests, best rank 11,352
- **HackerRank:** 5-star Python, 4-star Problem Solving, 3-star C++/C/SQL badges
